MARKET

International gateway
Corporate strategic partners
Innovation validation by our farmer network

ACCELERATING
AGRICULTURAL
INNOVATION

OUR MISSIONS

Support the development of businesses in conjunction with agriculture

Foster cooperation among start-ups, major groups, farmers and agronomic research

Disseminate innovation and knowledge into the farms, and promote our partners' skills

AgrOnov gives structures related to agriculture the chance to take root within a dynamic incubator and develop the network they need to further their growth for a progressive agriculture that is both profitable and responsible.

This cooperation promotes the growth of start-ups, gains in competitiveness of the major businesses and accelerates innovation and its transfer into the farms. AgrOnov's objective is truly aimed at creating added value for all actors in the supply chain.

The ecosystem is in the heart of the Burgundy Franche-Comté region, but the partnerships it is developing mean it extends throughout France and internationally.

OUR DNA

AgrOnov is designed to be a venue for exchanging, sharing knowledge and providing mutual support among actors in order to power their creativeness and stimulate innovation in agriculture. Because we are sure there is lots to learn from «living together», the AgrOnov community connects up scores of businesses from start-ups to major groups with universities, colleges, research centres, farmers, investment funds in agriculture and public bodies interested in innovation.

WHAT WE CAN OFFER
